INDEPENDENT SERVICE AUDITOR'S REPORT

SOC 2 Type II Report on Management's Description of a Service Organization's System and the Suitability of the Design and Operating Effectiveness of Controls
For the Period January 1, 2025 to December 31, 2025
Issued: March 15, 2026

Independent Auditor	Pinnacle Trust Auditors LLP
Service Organization	Vertex Transact Corp
System Under Evaluation	Merchant Payment Gateway and Tokenization Service

To the Management of Vertex Transact Corp and the Users of Vertex Transact Corp's Merchant Payment Gateway and Tokenization Service:

We have examined management's assertion that Vertex Transact Corp (the "Service Organization") maintained effective controls over its Merchant Payment Gateway and Tokenization Service (the "System") based on the Trust Services Criteria for Security, Availability, Processing Integrity, Confidentiality, and Privacy (the "Applicable Trust Services Criteria") for the period January 1, 2025 to December 31, 2025. Management is responsible for its assertion and the design, implementation, and operation of the controls. Our responsibility is to express an opinion on the fairness of the presentation of management's description and the suitability of the design and operating effectiveness of the controls.

1. SCOPE

The System consists of the infrastructure, software, people, procedures, and data necessary to provide merchant payment gateway, tokenization, and fraud-screening services to clients such as Société Générale International S.A..

2. OPINION

In our opinion, except for the matter described in the Trust Services Criteria Exceptions section of this report, the controls stated were fairly presented and operated with effective efficiency throughout the review period.

3. MANAGEMENT'S DESCRIPTION OF THE SYSTEM

[Management's description of the system, policies, and procedures has been included in the full report and is fairly presented in all material respects.]

4. TESTING OF OPERATING EFFECTIVENESS

We performed tests of the operating effectiveness of controls over the Applicable Trust Services Criteria. The nature, timing, and extent of testing performed are described in the accompanying Test of Controls matrix.

5. TRUST SERVICES CRITERIA EXCEPTIONS

Criteria	Exception ID	Description
----------	--------------	-------------

Logical Access (CC6.2)	CC6.2-02	Testing identified that quarterly user access reviews were not performed for two of four quarters (Q2 and Q3 2025). As a result, 11 terminated-employee accounts remained active for up to 47 days following separation before being disabled. No evidence of unauthorized use of the affected accounts was identified.
------------------------	----------	---

6. MANAGEMENT'S RESPONSE

Vertex Transact Corp management acknowledges the identified exception related to quarterly access reviews. All 11 affected accounts have since been confirmed disabled, and a remediation plan was implemented in January 2026 introducing automated HR-to-IAM deprovisioning to eliminate manual review dependency. Management expects full automation to be validated in the next audit cycle.

7. OTHER INFORMATION

This report is intended solely for the information and use of Vertex Transact Corp management, its clients (including but not limited to Société Générale International S.A.), and other specified parties who have a business relationship with Vertex Transact Corp and who are subject to the Applicable Trust Services Criteria. This report is not intended for any other purpose.

The report, including any exceptions noted, does not provide any assurance regarding future periods. Controls are subject to inherent limitations, including the possibility of management override.
